Our Redbay Stormforce RIB's are built for Atlantic conditions and have specifically designed features for our style of wildlife tours and water based activities. Our Oban base is from Dunstaffnage Marina which has parking, toilets, showers, gear trolleys and easy boat access. With our boat speed we are able to undertake charters from neighbouring islands or remote locations. Prices upon application.

### **RIB Cearban Mhor**

Licence - MCA Cat 2

Length - 12m

Passengers - 12pax + 3 crew

Engines - Twin Yanmar V8 - 640hp total

Speed - cruise 20kts max 45kts

Range - 267nm running - 333nm overall

Seating - 8 in cabin, 4 on deck

Extras - toilet cubicle, swim ladder, power

### **RIB Cearban (beag)**

Licence - MCA Cat 3

Length - 9m

Passengers - 12pax + 2 crew

Engines - Twin Yanmar 6cyl - 630hp total

Speed - cruise 20kts max 45kts

Range - 153nm running - 190nm overall

Seating - 3 in cabin, 9 on deck

Extras - swim ladder, power, changeable deck setup

# Cearban Beag Deck Layout

The canopy over the deck is modular with the ability to roll up sides for filming access but be kept down for comfort during travel or rain. The deck has a modular layout and can easily swap between the bench seat, rack for diving tanks or have a clear deck for maximum space. A very versatile platform.

## Bench Setup

This is our standard setup and provides the most flexibility for seating and a platform for equipment.

## Clear Deck

For maximum space we can remove the seat, leaving the seating to permanent side seats and cabin.

## Bottle Rack

This setup is used for when we have divers on board and securely stows all diving equipment for transit.

## Ancillary Boats & Paddle Sports

### Excel Vanguard 535 with 20hp Engine

A large navy seals style inflatable with big deck & seats space. Powerful 20hp engine. Used mainly for passenger shore transfers and diving. Can be towed by RIB or road & launched via trailer.

### Excel Vanguard 335 with 6hp Engine

Our normal setup for island landings, either with or without the engine. Towed by RIB from stern platform.

### Paddle boards & Buoyancy Aids

We have a 'fleet' of 8 inflatable paddle boards that we use for guided sessions. They can be added into any charter or filming project.

### Kayaks & Buoyancy Aids

We have another 'fleet' of inflatable kayaks, used for tours and in calm waters. We also have a larger surfski style kayak that has been used on filming projects and safety for swim challenges.

## **Watersport & Personal Equipment**

3mm, 7mm & 8mm Wetsuits with all accessories (boots/hoods/gloves)

Snorkelling Equipment (fins, mask, snorkel, weights/ weigh belts)

Scuba Equipment (BCD's, Regulators, Cylinders, Instruments)

## **Plant**

Bauer Oceanus Portable Breathing Air Compressor (5cfm)

2kW Petrol Portable Power Generator

## **Underwater Filming Equipment**

Nikon D7200 in Aquatica Housing & 8" Dome for use with Tokina 10-17mm fish eye or 11-16 rectilinear lens.

SOLA 2000 Lumen Video Lights (x2)

SOLA 2500 Lumen Video/Dive Lights (x4)

2 x GoPro8 Black Edition with variety of accessories

Orca Seawolf - Surface Light System

Professional lighting rig, used for illumination of dive sites and underwater floodlight night operations. Power supply from mains or generator. Surface control station and three umbilical lighting heads. 1 x 30m & 2 x 15m.

## **Example Media Work**

Our staff are all marine biologists with particular expertise in wildlife, along with professional diving and crewing experience. Shane has expertise in underwater filming and film making. Please contact us for advice on location opportunities, wildlife subjects or logistics.
